DogValet – Aluminum

Inventory

The below items are included in the shipping box

- Aluminum DogValet container - forest green
- Two keys - for locking front access
- Two rolls of litter pick-up bags - 200 count per roll (preinstalled in lid)
- One roll DogiPot liner trash bags - 50 Count
- Aluminum mounting pillar
- Hardware – two 2" x 5/16" bolts and lock washers

Please check the above inventory and call if any parts are missing.

Installation

Day One

1. **Select a good visible spot** in your community or park where you want to install the DogValet. Park entrances are typically good locations as visitors can take a pick-up bag on their way in and deposit the filled bag on their way out.
2. **Dig a hole** 18" deep x 7" around.
3. **Mix concrete and pour into the hole** - mix, according to bag instructions, a 40 lb bag of "ready to use".
4. **Insert the mounting pillar** up to the marker line – approximately 12" into the hole. The mounting plate should be about 10 ½" above ground level.
5. **Level the post** in a straight vertical position and **let concrete dry for at least 12 hours.**

Day Two

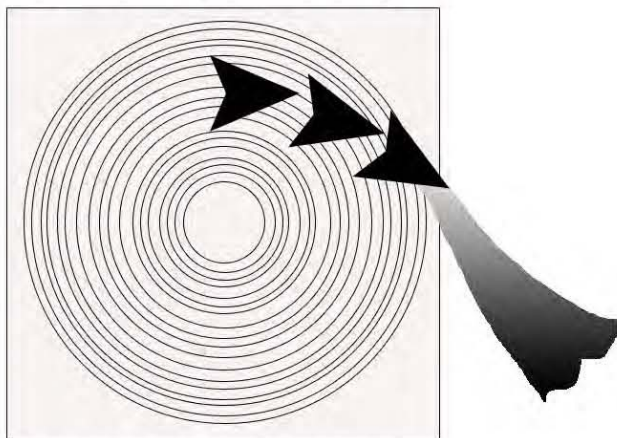

1. **Slide the DogValet** (container) **over the mounting pillar.** Line up the holes on the container with those on the pillar. **Secure** with the two 5/16" bolts and lock washers using a ½" wrench.
2. **Insert a trash liner bag** into the container body folding it over the upper edge of the container.
3. Now sit back and relax while the pet owners pick-up after their dogs!

Bag Installation

For proper bag dispensing, be sure of the following:

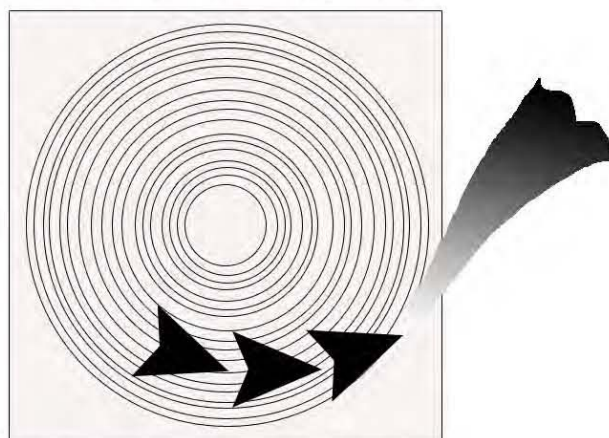

- The lid dispenser slots match the pick-up bag box slots
- The lettering on the pick-up bag boxes is right-side-up
- The lettering on the pick-up bags is visible on the top when the bags hang out of the slots
- The bags will be dispensed following the upper wall of the dispenser slots - see Illustrations below

Correct Bag Dispensing

Bag pulls down from top.

Incorrect Bag Dispensing

Bag pulls up from the bottom.
